Solta-103K
Lightening binder

Technical specification TY 2313-010-57845504-2005

Lightening binder Solta-103K is used in glitter and pearl inks production for gravure and flexographic printing on paper and Vlies.

Physico-chemical properties

item	value
appearance	White viscous homogeneous liquid free of foreign matter and clunch
Non-volatile matter content, %, minimum	27
pH	7 - 9
Funnel viscosity, VS-246 flowmeter type, 6 mm jet size, minimum	50

Inks based on Solta-103K binder stand abrasion test on vinyl by 2% soap solution minimum 100 stages.
