**Solta-104P
Binder**

Technical specification TY **2313-010-57845504-2005**

Water-reducible binder Solta-104P is used in glitter and pearl inks production for gravure and flexographic printing on paper and vinyl.

Solta-104P provides high gloss of pearl inks and glitter-based compositions.

Physico-chemical properties:

item	value
1. Appearance	Milky white liquid without visible delamination
2. Non-volatile matter content, %, minimum	6
3. pH	7 - 9
4. Funnel viscosity, VS-246 flowmeter type, 6 mm jet size, minimum	50

Inks based on Solta 104P binder stand abrasion test on vinyl by 2% soap solution minimum 100 stages.
